"Not this war, Geralt. After this war, no-one returns. There will be nothing to return to. Nilfgaard leaves behind it only rubble; its armies advance like lava from which no-one escapes. The roads are strewn, for miles, with gallows and pyres; the sky is cut with columns of smoke as long as the horizon. Since the beginning of the world, in fact, nothing of this sort has happened before. Since the world is our world... You must understand that the Nilfgaardians have descended from their mountains to destroy this world." *The Sword of Destiny* is the sequel to the *Witcher's* first collection, *The Last Wish*, picking up where the previous book left off. The continuity is surprisingly fluid with the stories being surprisingly interlinked and best read in the order that they are published. *The Sword of Destiny* is also absolutely essential to understanding the later novels in the series, which is unusual when dealing with short stories. *The Sword of Destiny* is also surprising in that it contains

some of the lightest and darkest of the Witcher universe slammed together in one volume. There's stories which include silly stories about Medieval stock market manipulation and a retelling of The Little Mermaid alongside tales of genocide as well as forced relocation of native peoples. This is a really impressive display of the variety of Andrzej Sapkowski's work. I'm particularly fascinated by the character development of Geralt, new character Ciri of Cintra, and the Nilfgaardian Empire. Geralt gets expanded from The Man With No Name with swords, basically, to a man who is deeply suffering for his inability to find love. Ciri of Cintra is one of the rare non-annoying children in fiction, rivaling Newt from Aliens for how much I like her. The Nilfgaardian Empire?
