Learn In Your Car: Japanese, Level 1

Synopsis

The Learn in Your Car language series is the first system ever designed to teach a language in your car...or anywhere...without a textbook. Simple and effective, you can learn to converse in another language while driving, walking, or doing tasks around the house. And now with Learn in Your Car from audible.com™, you can turn your PC, your Rio, or any mobile device into your own personal language tutor. Each course is organized the way you learn best - by learning words and phrases - and building these into sentences and clear conversations. Arrange hotel accommodations, order in restaurants, change money, and feel more at home next time you travel! The Learn in Your Car language series is: Easy to use without a textbook Prepared by dialect-free professionals Available in levels for students of all abilities Designed to teach grammar basics through recorded examples Level 1 offers an introduction to key words, numbers, phrases, sentence structure, and basic grammar. Level 2 teaches more challenging vocabulary, additional grammar, and targeted sentences designed to generate confidence in your ability to comprehend and converse. Level 3 presents expanded vocabulary, advanced grammar, and more detailed sentences to extend your conversational skills.

Customer Reviews

If your goal is to communicate verbally while traveling and you prefer to learn from interaction and practice rather than studying a book, this is an excellent resource. This gave me enough skills to get around Japan and greatly added to the enjoyment of my trip. If you have the impression that 'everyone' speaks English in Japan, then don't leave Tokyo. My simple interactions opened a lot of doors and made folks happy to deal with me rather than ignoring the tourist. It also made folks more

comfortable to try a little English, after they heard my efforts at Japanese. Between the two it worked out great. The tapes covered all the standard phrases dealing with travel and they can take you a long way. 'Denshya no eki, a doko des ka?' or 'Where is the train station?' got me out of a lot of trouble, everytime I got lost doing walking tours in the countryside. I've also used the German tapes and have just ordered the French. I've bought many a language book and so far these are my favourite.

I would give this 5 star rating if it weren't the lack of grammar features in the beginning. My commuting to and from work takes almost two hours a day. That's the reason why I bought this product (I have both CD and cassette tape versions as each of my two cars have CD player and tape player only). I have tried two other products for learning Japanese before, but they were absolutely useless as I had to have a book in front of me while listening. This product allows you to listen to the tape or CD in the car while driving. Every word or phrase is pronounced in English first, then in Japanese twice in pure Japanese accent - with pauses in between so you can practice pronouncing it, too. It is a simple method, but it works amazingly well. Remember the most efficient way of learning a language (at least in the entry level) is by speaking and listening, not reading from a book. It also comes with a small book that describes meaning and pronunciation of every word / phrase used in the audio feature. One can easily review it after or before listening to the tape / CD. So what is the flaw? This does not give you grammar review in the beginning (only have completed first CD so can't tell you for the rest) so it can be confusing for some listeners at first. Japanese and English do not have the same arrangement or order when it comes to lining up subject, verb and objective. I wish this is discussed more in the beginning.

In general I found these discs (Level 1 to 3) good for covering basic vocabulary whilst out of Japan. However, they never really get you further than a basic understanding because at no time are you taught sentence conjunctions or how to express running thoughts. These very important points are covered by courses such as Living Language Japanese (basic-intermediate and advanced) but probably put off the beginner who wants or needs instant results. Further, there are mistakes in the application of some grammar points which may become a burden if you decide to continue your studies to a higher level. Treat this course as a good way to get started, but then progress to something like the Living Language courses which provide a better understanding of the language - but don't be surprised when you find some point of grammar you spent so much time mastering in the 'In-your-car' series turns out to be over-simplified or just plain awkward in real speech and
